## — Personal Statement

I build innovative solutions with modern technologies and frameworks, taking a focused approach to provide functional results with a creative flair.

My key skills lie in the design and development of responsive front end systems - crafting experiences that encourage, assist and impress the user on their journey.

With a love of new challenges, I have a strong self-motivated interest in continuously expanding my skill-set in my personal time to cover the latest and greatest technologies. This coincides with my keen interest in the research of user experience and best practices on new platforms/medias.

Competently operating within tight deadlines on a regular basis (agency workflows), I work closely with my colleagues to discuss, understand and overcome roadblocks - leading to results that exceed requirements and expectations.

I have worked on numerous popular content management and e-commerce platforms to date, including Laravel, OpenCart, CodeIgniter & Wordpress. B2B & B2C projects. Experience in producing numerous HTML email templates for use in campaigns and e-com.

Providing a day-to-day support service to existing and legacy systems has allowed me to amass a much broader knowledge of current techniques and previous standards. This also allowed me to build strong communication skills and ongoing relationships with clients.

Commonly used technologies include SCSS/Sass/LESS, OOCSS, Foundation and Bootstrap - applying automation with Gulp, (prev. Bower) and Node.js to speed up day to day processes. Strong interest in quality control and optimisation.

Graduated with a First Class in BSc Web & Multimedia (now Web Design & Development) from the University of Central Lancashire (2014).

---

## — Attributes

**Strive for Perfection** | Particularly evident in Design and Development projects, pleasure in the highest standards of precision and quality. This is a trait highlighted by many colleagues.

**Persistence for Solutions** | Working overtime if required to overcome challenges, to produce the best possible outcome within the given timescale; Applicable in both work-related and personal tasks.

**Punctuality** | Ensuring flawless attendance is of great importance to myself, as proven by both previous education and employment records. This ensures no information is missed or work left unfinished.
